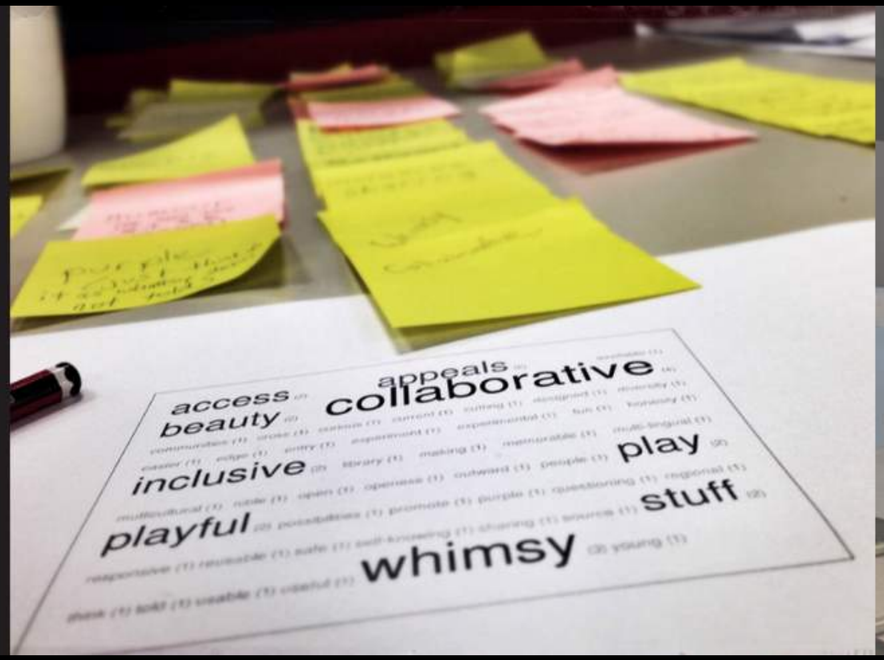
Here to change the way our users think about what a library can do in the 21st century

Push boundaries: design thinking

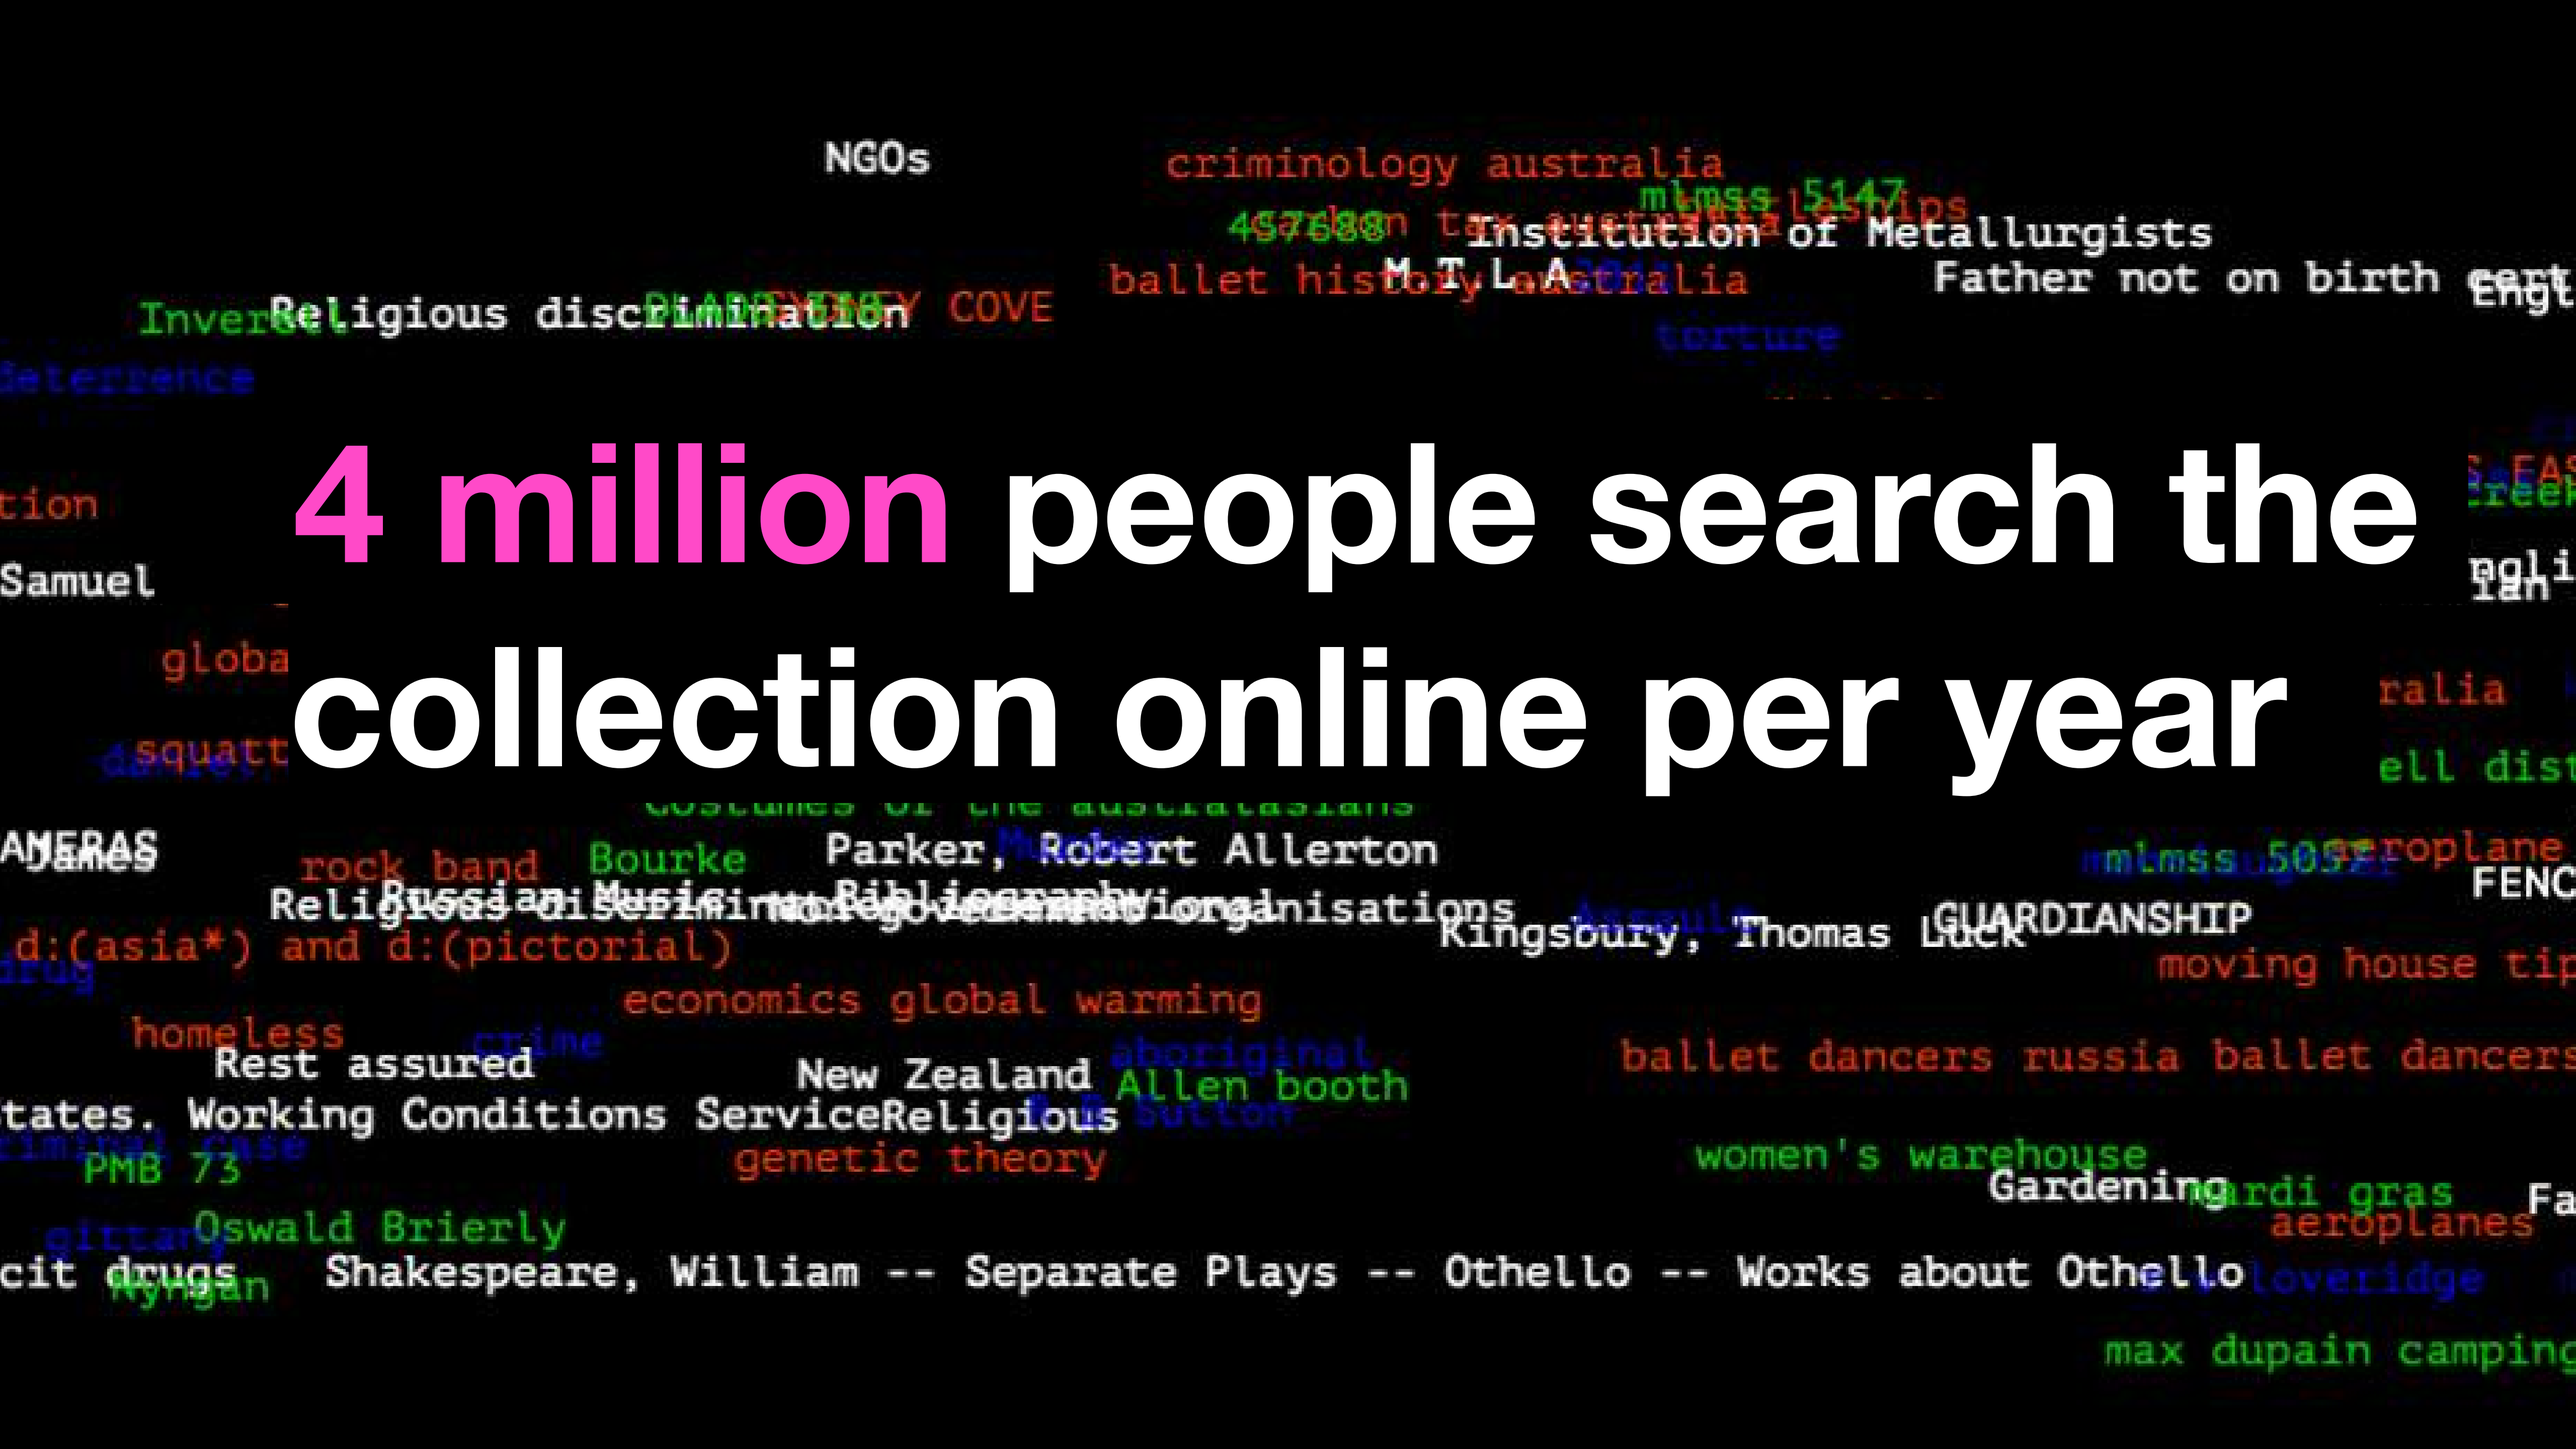
MADE WITH,
PLAYED WITH,
REMADE.



Place for experimentation, research and collaboration

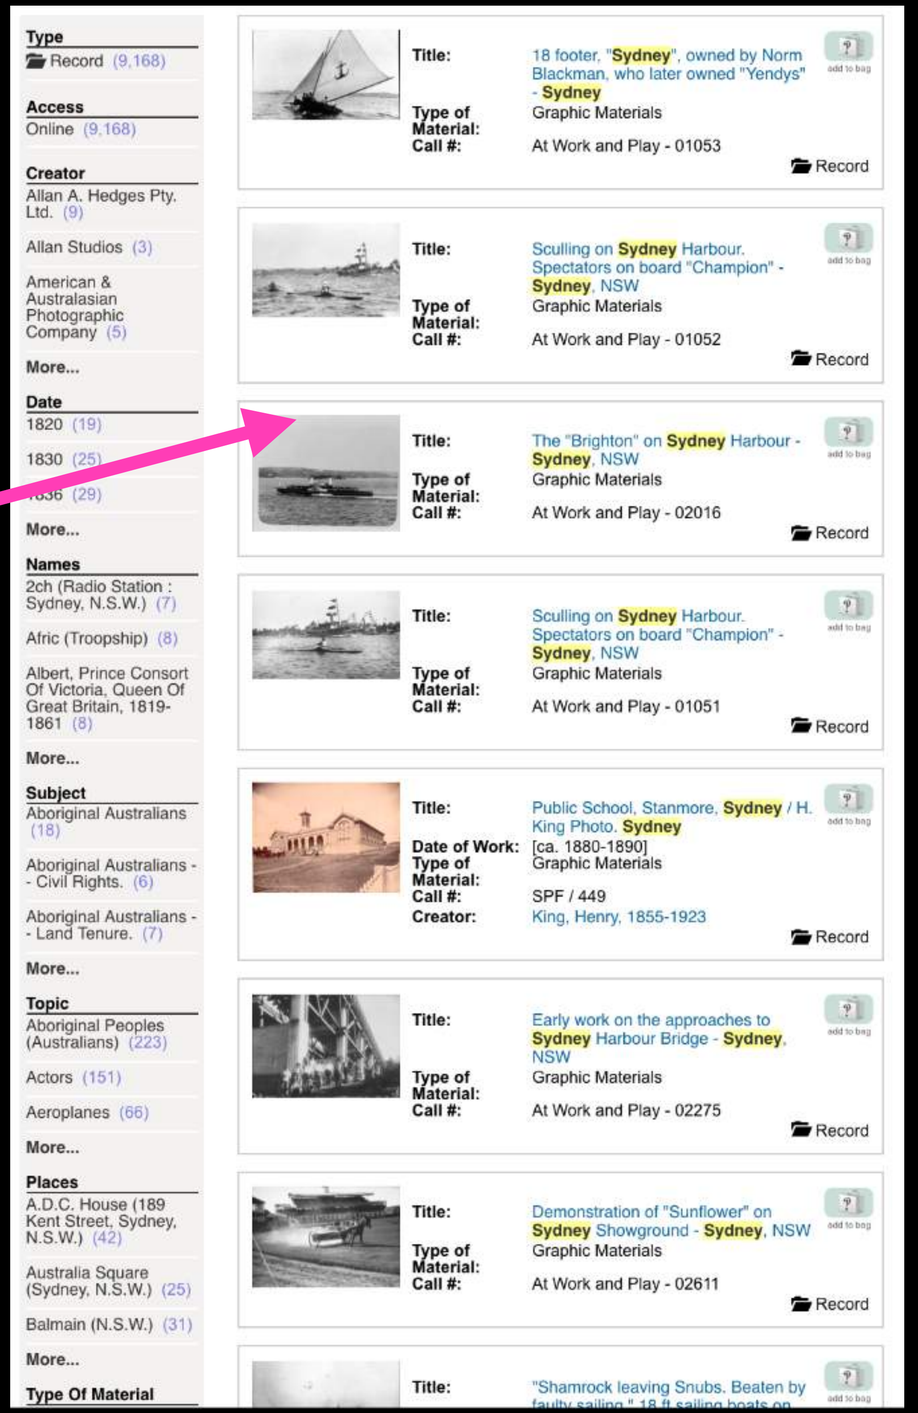
We want users to be inspired to research, use, adapt and create with these collections.

6 million digitised items

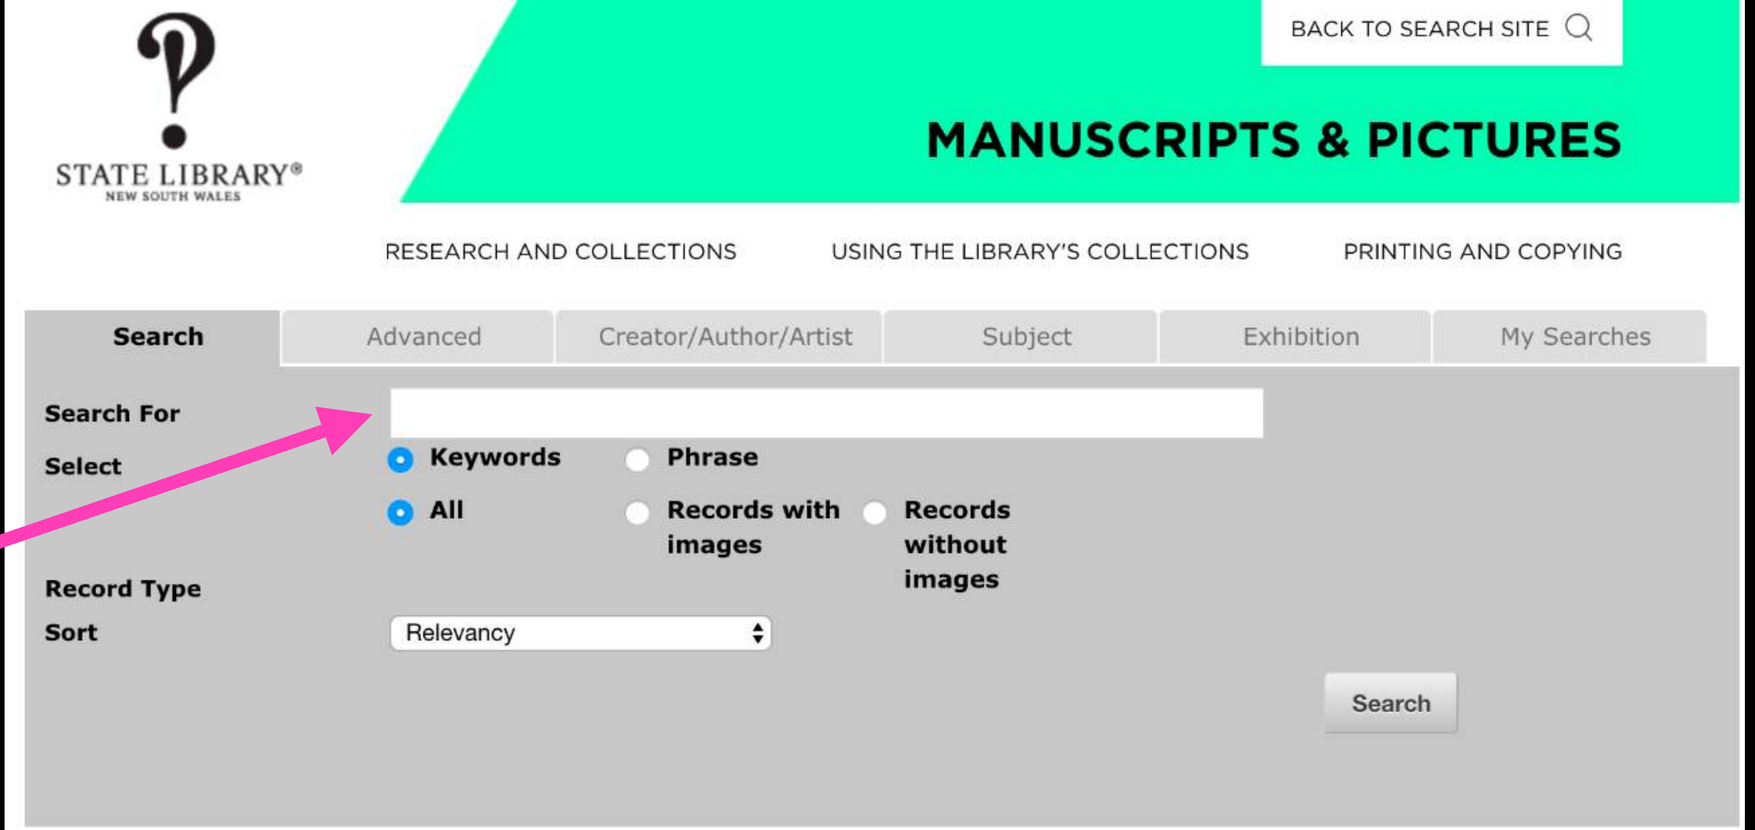


4 million people search the collection online per year

Item by item one-to-one relationship return



Little white box



About the Catalogue

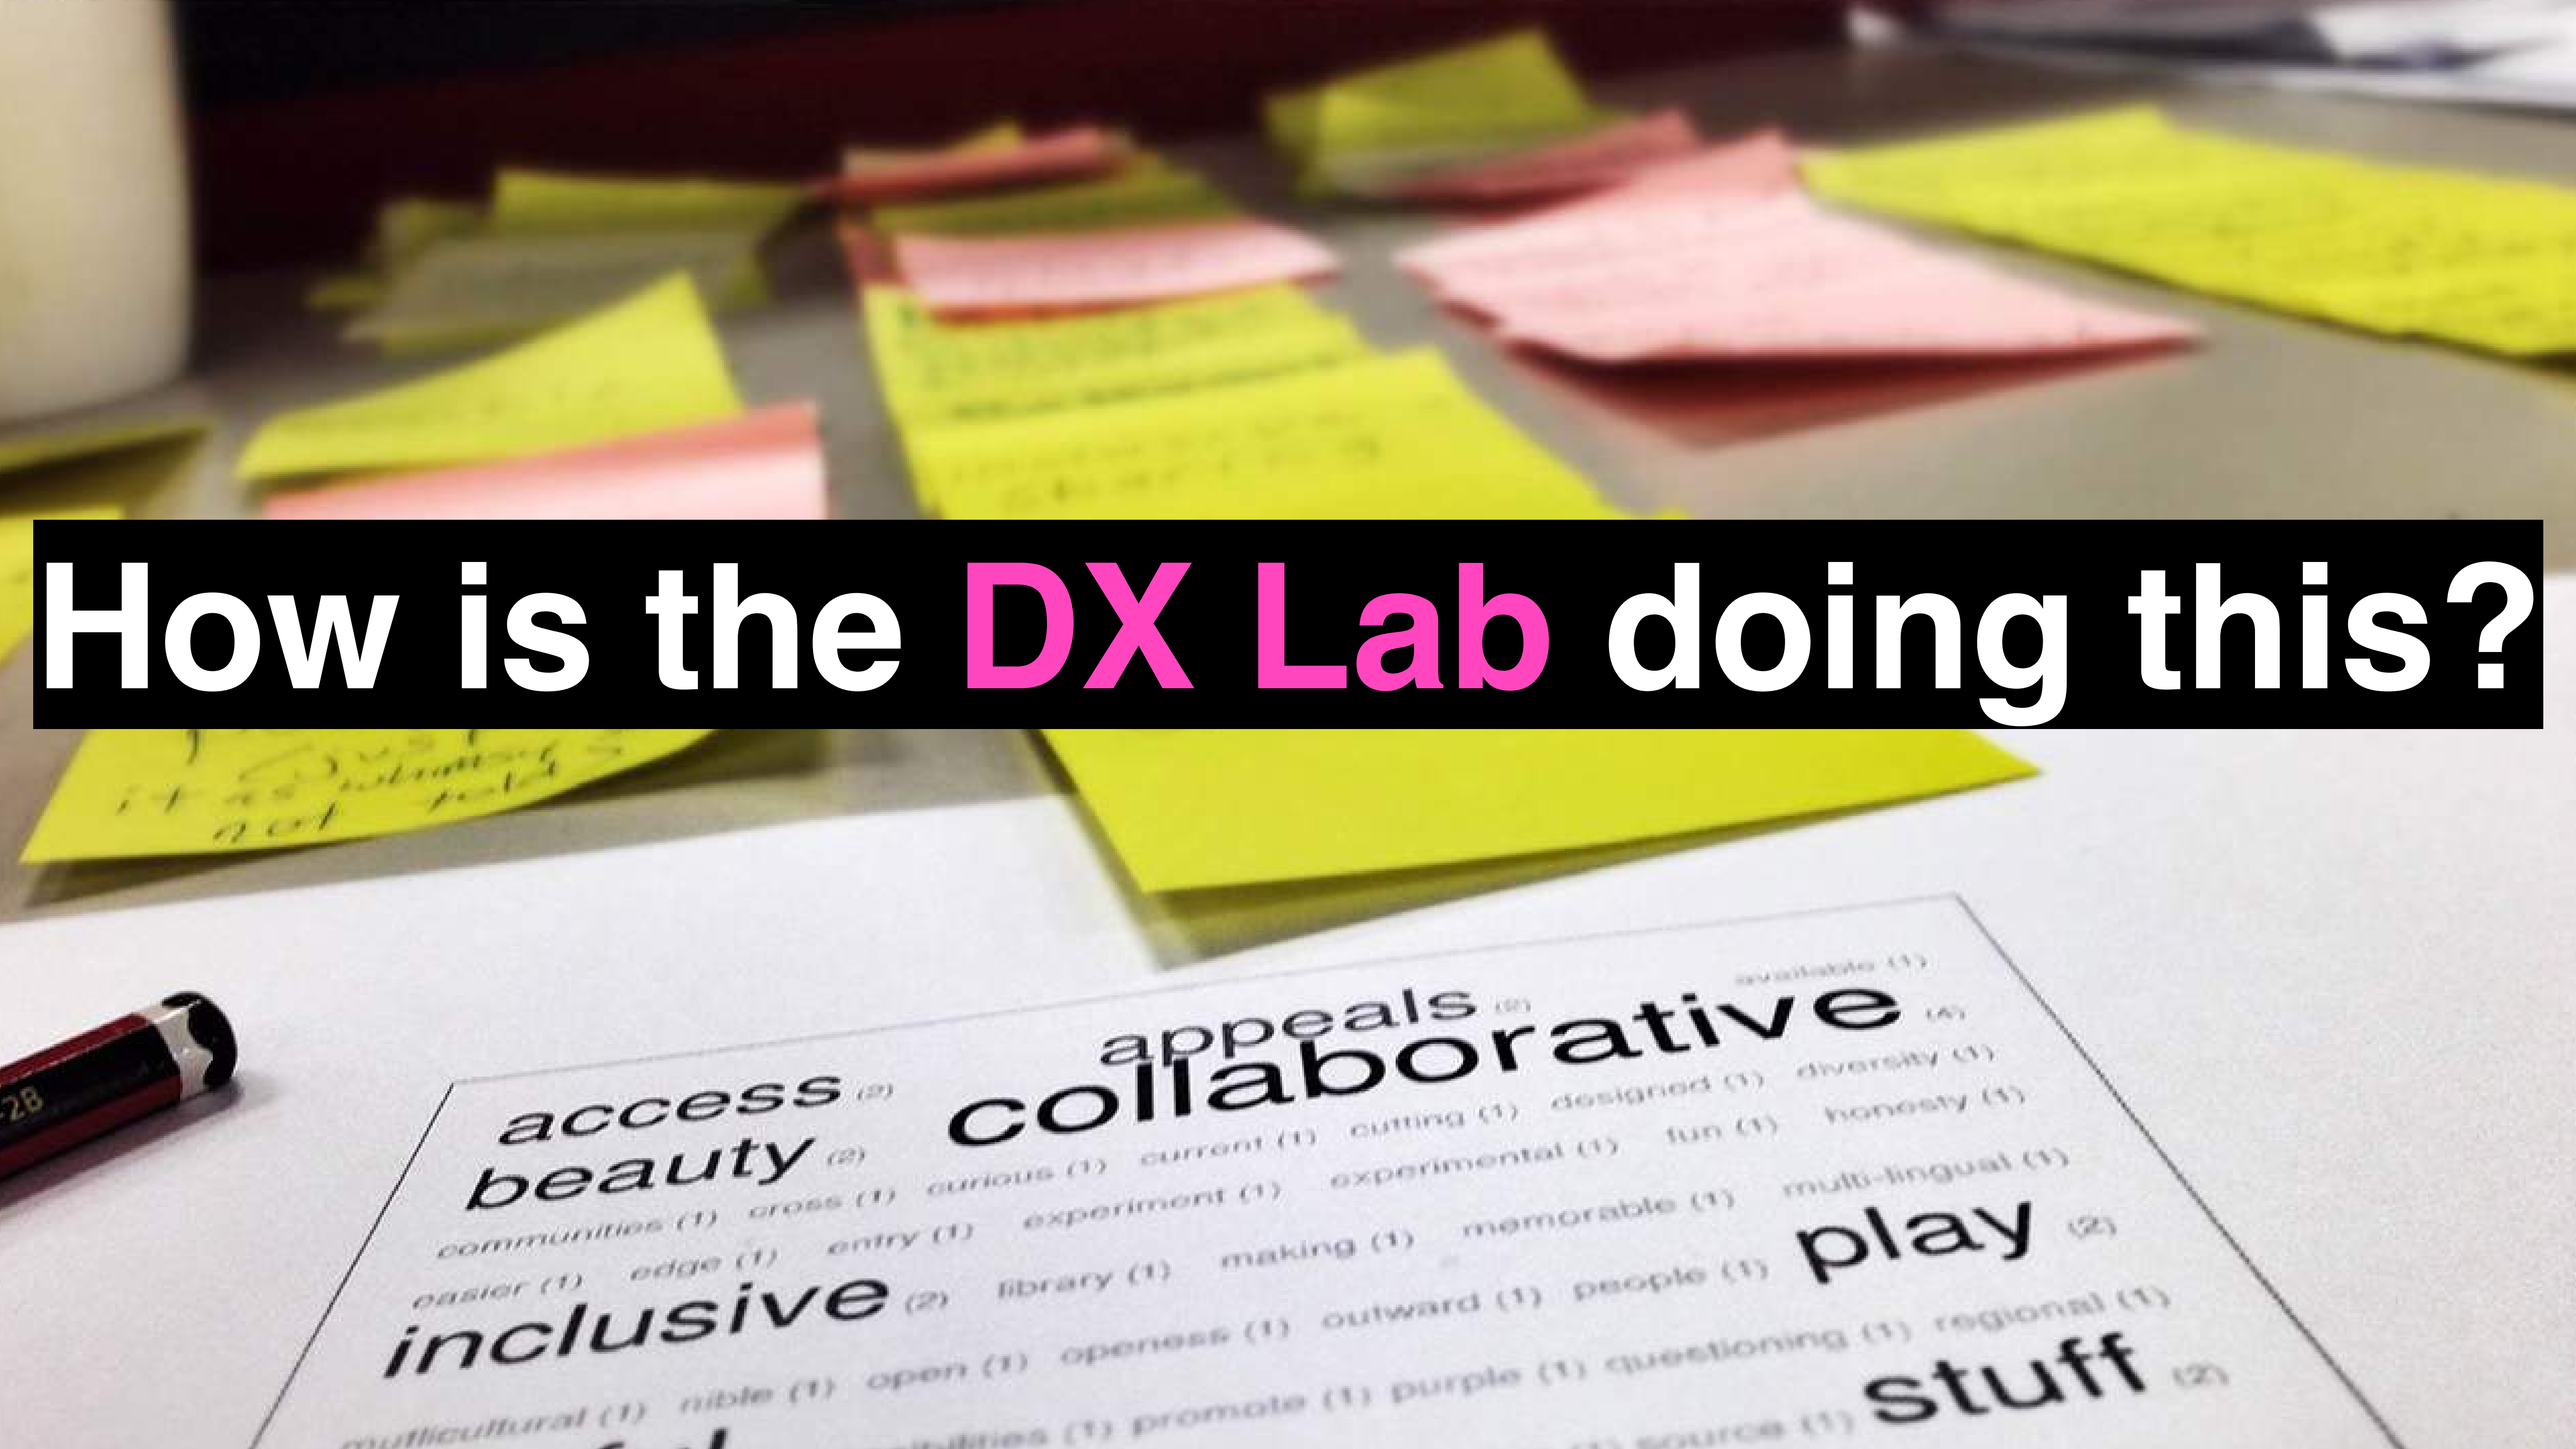
This catalogue contains records of the manuscripts, oral history and pictures collections of the Mitchell Library, Sir William Dixson Library and Dixson Galleries.

This new version of the catalogue contains additional content which has been transferred from paper based collection guides and contents lists that have previously only been available in the Mitchell Library Reading Room.

The inclusion of this additional rich content and the development of this new catalogue has been possible through the support of the NSW Government through the eRecords project. Published material including maps can be found in the State Library's Catalogue for published material.

Members of Aboriginal, Torres Strait Islander and Māori communities are advised that records may contain names and images of deceased people.

All users of the catalogue should also be aware that certain words, terms or descriptions may be culturally sensitive and may be considered inappropriate today, but may have reflected the author's/creator's attitude or that of the period in which they were written.



How is the DX Lab doing this?

Collaborate | Experiment | Create | Engage | Be Open | Surprise

Photo by Keith Garner CC BY 2.0

Audience first: do it because it matters not because it’s shiny

Design creatively: with data and partners

Don’t over bake: audiences need to connect through simple + meaningful experiences

Innovate: be sure to push the boundaries

Iterate: if something is already built, just improve on it.

Constant prototyping: leave room for others to finish and build upon our experiences

MADE WITH,

PLAYED WITH,

REMADE.

What we learnt.

Broad perspective of collection
Lenses help us view and access items differently.
Sketch in code. Design and Development. Shift in relationship
Importance of consistency and structure within metadata
Scale is vital in decision making for an archive.
Digitization now needs to shift to contextualization.
Catering to curious users can open up collection.

The Anthropological Society of Australasia Survey

This is Box 4 of MLMSS 7603 / Boxes 4-5: Survey forms and correspondence received by the Royal Anthropological Society of Australasia regarding Aboriginal place names, 1899-1903. Floating pages have transcribed placenames.

Folder 1

Page 1

Page 1 is a survey form. The page is dated Nov 1899 {?}.

We have located the following placenames:

1. **Boondi** (*Bondi*): Noise made by sea wave breaking on beach
2. **Koojah** (*Coogee*): Bad smell, caused by the decay of large quantities of seaweed washed ashore
3. **Merooberah** (*Maroubra*): The beach was named after the tribe that inhabited the particular place
4. **Bunnabee** (*North Botany Head*)
5. **Givea** (*South Botany Head*)
6. **Kundul** (*Captain Cook's Landing Point*)
7. **Goonamarra** (*Cronulla*)
8. **Bulla** (*Bulli*): Two mountains
9. **Bellambi**
10. **Dapton** (*Dapto*)
11. **Elowera** (*Illawarra*): Pleasant place
12. **Woolyungah** (*Wollongong*): Five islands
13. **Kiare mia** (*Kiama*): Fish may be caught from the rock
14. **Minna-murra** (*Minnamurra*): Plenty of Fish
15. **Gerringong**
16. **Cooloongatta** (*Coolangatta*): The highest land (a lookout)

#50libcats

50 CATS

1. Think of a theme or idea. It doesn't have to be your area of expertise, it can be quirky, fun, or as serious as you like ! It can be "100 cookbooks about cheese" or "Cat pictures in the Collection", it can be "Photos of people falling over", or "Sydney picnic spots in the 1900s". Show your creative side, and your personality.
2. Using the SLNSW online collection search, start compiling your list. Copy and paste data according to the headings into the spreadsheet below.
3. Between 20 and 100 things is a good size to aim for, but there are no limits
4. Make sure the catalogue records are up to date with high res images, correct information, accurate date range etc. Fix is the data in ACMS if needed.
5. Submit your excel list to the DX lab via email.
6. The winning idea will be judged and the winner for the round will receive the "50 CATS" trophy to sit on their desk until the next round

Research
Concept
Design

Experimenting is important
Prototyping is critical for design thinking
Data is messy and will not always do what you think it will do
Be prepared to pivot
Tell your audience it’s an experiment
Sketch lots (and in code)
Build upon code- iterate
2 week sprints- often go beyond this
Share your findings

THANK YOU

dxlab.sl.nsw.gov.au
